

## **Compview Medical Announces New Product Debuts at OR Manager 2012**

*Second Generation NuBOOM – the U Series extends performance capabilities; and M2 Direct Connect, the most affordable NuBOOM ever*

Today, Compview Medical, LLC announces the debut showings, at OR Manager 2012, of the second generation NuBOOM, the U Series, as well as the M2 Direct Connect, which sets a new affordability standard.

The U-Series NuBOOM is the second generation NuBOOM, of which over 200 systems have been installed to date. The U-Series NuBOOM further improves upon the concept of a floor mounted equipment management, visualization, and ergonomic boom appliance that provides modern ergonomics, visualization, and improves safety by helping to remove trip hazards from the OR. New features include booms equipped with precision bearings, equipment shelves that swing toward the patient, sleeker superstructure, and 26" high brightness LCD displays manufactured by NDS.

The M2 Direct Connect is a product line extension of the existing NuBOOM M4 and M2. The M2 Direct Connect simplifies, hence lowering cost, of video routing and display of the image. The M2 Direct Connect displays images on 24" LCD monitors also manufactured by NDS.

Like all NuBOOM variants, the new products feature a two day installation process that minimizes OR disruption and costly downtime.

"The U-Series and the M2 Direct Connect are the refinement of hundreds of NuBOOM installations and thousands of procedural uses of our original NuBOOM system," says Paul White, President and founder of Compview Medical, LLC. "The NuBOOM does what is impossible for traditional ceiling suspended equipment management and monitor booms. The NuBOOM has more points of articulation, more inherent adjustability, and requires just two days to install. NuBOOM can place four monitors better than anybody. Hospitals that need to upgrade outdated ORs for better visualization, surgeon ergonomics, and clutter reduction have embraced the NuBOOM because there is no better feature/value equation on the market. The U-Series adds even more flexibility and room around the operating table. Our backlog to 2013 at the time of launch shows that the market is embracing the value equation of the NuBOOM".

About Compview Medical:

Beaverton, Oregon-based CompView Medical ([www.compviewmedical.com](http://www.compviewmedical.com)) is the manufacturer of the NuBOOM, the world's first all-in-one equipment management, visualization, and ergonomic boom appliance for use in operating rooms. Compview Medical, a privately held company, is one of the fastest growing providers of visualization capital equipment for medical image visualization.
